Education

2022 - 2025
BSc (Hons) Computer Games Design
University of Gloucestershire

2020 - 2021
LLB Law (Hons)
Certificate of Higher Education
University of the West of England

Skills

3D Modelling and Texturing

Environment Art Asset Creation

3D Retopology

Level Design

3D Character Animation

Project Management

Documentation and Organisation

Expertise

Blender

Autodesk 3ds Max

Adobe Substance Painter

Unity

Unreal Engine

Adobe Suite

Zak Brown

3D Environment Artist and Game Designer

A motivated second year Game Design student with a passion for 3D environmental art with a strong understanding for level design and game development. A self-driven, hardworking individual with strong communication and team working skills, which resulted in leading a group game project, that was invited to be showcased at COMX.

Relevant Skills

3D Modelling and Texturing

- For ABC Anchors, a Construction Company, I have produced industry standard, high quality models. I also textured them according to their desired art style and created a tech demo animation, in order to demonstrate the equipment.
- On my Game Design course, in group work I have helped build the teams artistic vision and have used my skills to create aesthetic environments that engage the player.
- During University, I was contracted as a Prop Artist for a Masters project called "Phantom Paws". The game was developed for the Nintendo Switch and was exhibited at Insomnia #i72.
- I have an in depth knowledge of 3D modelling, topology, texturing and optimisation.

Game Design

- During my studies, I have designed many high quality game features and mechanics. This can be seen in the co-operative game I was part of, as one of my roles was producing a clear vision and an overall design for the game.
- I have a strong understanding of level design and have designed a variety of levels, including a 20 player third-person shooter level, puzzle levels and an action adventure level.
- Within other group work, I have taken on the role of creating the design documentation, as I have good attention to detail and can communicate the production process effectively.

Team Working

- On my Game Design course, I took on the lead responsibilities within our six-person team. My role included managing members of the team's progress and ensuring everyone was meeting deadlines. I was also responsible for creating, delivering and leading presentations.
- At Lidl, I developed my team working skills by contributing to the smooth-running of the store during the Covid19 pandemic, where the store had a maximum of 60 people in at a time.

Communication and Time Management

- During my work with ABC Anchors and my time at University I have effectively built on my communication skills, through my ability to take on feedback and iterate effectively and accordingly.
- During the nightshift at Lidl, I would have many additional tasks to complete, as well as serving customers before the store could be closed, but due to my ability to plan out tasks and execute them efficiently, I was able to complete all the tasks on time and to a high standard.
